

Krishna Mohan Pandey

(Corporate Trainer)

SUMMARY

With experience of more than 12 years on Training, Research & Development in the field of Machine Learning/Python /AI / Image Processing /Embedded System/ IoT/ MATLAB /Wireless Sensor Networks/ Communication System etc. as a Trainer and Consultant, delivered 100+ training sessions & FDPs, developed several IoT solutions using Cloud Platforms for startups and built ML models using several algorithms which fit best for the requirements.

PROFESSIONAL EXPERIENCE

1. Working as Trainer for Machine Learning & AI, IoT- Internet of Things, Embedded System, Robotics, Artificial Intelligence (AI), MATLAB, Image Processing.
2. Experience in C, C++, Python, AI/ML, Data Science, HTML, CSS, SQL, MATLAB, Power BI.
3. Training sessions were delivered across PAN India.
4. Seminars & Workshop delivered on Machine Learning, AI & Data Science.
5. Delivered more than 100+ Workshops & trainings on National Level.
6. Delivered Faculty Development Program on various technologies.

TRAINING EXPERIENCE

Workshop on Python, Machine Learning, AI, Data Science, MATLAB, Robotics & Embedded System delivered at top institutions in India like IIT Kanpur, IIT Varanasi, IIT Delhi, SRMU Lucknow, BBD Lucknow, IIMT Meerut etc.

EDUCATION SUMMARY:

CORP OFF: 1ST FLOOR, AB-BLOCK, DILIPPUR TOWERS SAPRU MARG HAZRATGANJ LUCKNOW
+91-8090039028, +91-8896986415
www.logicproindia.com, info@logicproindia.com

B.Tech in Electronics & Communication Engineering.

TECHNICAL SKILLS:

- Programming Languages: Assembly Language, C, Embedded C, C#, Python, Java, SQL.
- Hardware: Arduino, Raspberry Pi, Nodemcu, ARM, AVR, ATmega 16, 8051
- Protocol: SPI, USART, I2C, CAN, BLE, IoT, HTTPS, MQTT, AMQP
- Circuit and PCB designing with Easy Eda and Express PCB
- Sensors & Actuators

ARTIFICIAL INTELLIGENCE & MACHINE LEARNING:

Project & Tools Description

- Development all machine learning problems in python.
- Multilayer ANN concept by using Tensorflow.
- RNN and CNN using Tensor Flow
- Deployment of machine learning & AI with all the AI & scientific tools Theano, SciKit, sciPY, NumPy, SVM, Fuzzy Logic, Pandas, Matplotlib on Anaconda IDLE using Python Jupyter, Spider, IP[y] QT console.
- Regression problem, Gradient Descent Algorithm problem solving
- Implementation & development of supervised and unsupervised learning using python with pandas, Matplotlib.
- Neural Architecture, designing Neural Network models with data training, correct prediction model, Forward propagation, backward propagation implementing by NumPY, Scipy, Matplotlib,
- Intelligent prediction making problem models and implementation using Fuzzy Logic. Implementing formulation, defuzzification, rule base in training problem models for intelligent machine.
- Sklearn library implementation in machine learning.
- Database mining in machine learning, importing and exporting training data.

- SVM Classification, NLP
- Generative AI & Prompt Engineering using OpenAPI, Langchain framework etc.

Business Skills:

As a Consultant, got a good grip of some of these skills such as, Project Implementation, Inventory Control, Strategic Planning, Creative Problem Solving, Data Analysis, Market Analysis and Strategy.
